WHAT IS THE SETTLEMENT PROJECT?

The Settlement Project was founded in response to several post 1990s developments that now have us in a moment of real danger for the future of our country.

These developments include:

- 1** The studied creation of new Radical Left philosophies and
- 2** Shift in the primary national enemy of the United States
- 3** The new, post-Marxist philosophies now dominate colleges and the education system churns out 1000s of radical Left ideologues who have gone on to infiltrate every corner of American society.
- 4** The shift of America's primary state sponsored enemy from the Soviet Union to the CCP is a profound and fundamental shift from Western culture to the CCP in Pacific Rim, Asia

First the Philosophy

Following the Fall of the Soviet Union in '89 and '90, European and American Leftists transformed violence-based Marxism into a swarm of virulent anti-God philosophies.

History always has this clash: Pro-God, pro-human-freedom systems, and anti-God resentment fueled philosophies. They each vie to control culture and human life.

As life becomes more complex, so do the thought systems.

- 1 The constructive side opts for humility before a greater power, and trust in nature which provides us with such things as the beauty of family.

- This humility allows the God-side cultures to grow and improve. We acknowledge our wrongs, and work to correct our mistakes. As such we grow in ever greater freedom and equality.

This work is never finished. We never stop trying to be better.

- 2 The humanist-materialist side however believes humans (not God) can make things better. This side instead of trying to improve, instead works to craft ever more devious and treacherous ways to gain control over others. Humanist-Materialist systems seek absolute power to force compliance.

- This tends to be driven by a strategy of blackmail, smear campaigns, and gaslighting through the exploitation of identity. (Such as race, gender, sexual orientation etc.)

Since elitist humanists think they, rather than God, can solve injustice they seek total control to enforce their remedies by any and all means. The beginning of these tactics is the pretense (or perhaps authentic sentiment) of care, but because they define themselves of the arbiters of good and evil, the care ends up in gulags and genocide. The French Revolution plan for government based on human reason, ended with the Reign of Terror, the guillotine and rivers of blood running through the streets of Paris. The Bolshevik Revolution to build a utopian classless society resulted in the genocide of 10s of millions of innocent human lives.

It was America that blocked the ascent of total victory of International Communism pushed politically and militarily by the Soviet Union.

Communist ideology could not overturn our founding. We are free and equal, and these come from God and from no person.

The Soviet Union could not defeat these four things:

- 1** America's relationship with God.
- 2** Prosperity from our free market economy (which put the lie to Marxist economic theory)
- 3** Our Christian-based ability to sacrifice,
- 4** The creative ingenuity that arises when people are free, made us indomitable militarily.

These strengths coupled with the philosophical bankruptcy, ended Soviet Marxism. It collapsed like Building 7 on 9-11.

What happened after that is why The Settlement Project Exists today.
Four Things

- 1** Radical Leftists built new more complex division and violence based philosophies
- 2** Radical Leftists applied more systematic and superior tactics to destroy America from within
- 3** America's main state enemy shifted from the Atlantic to the Pacific Rim culture CCP
- 4** Globalist techno-fascism arose to participate in the destruction of American freedom

A main mission of The Settlement Project is to clearly reveal the flaws of all new Radical Left philosophies so that God centered scholars, activists, elected officials, and influencers of culture have the ideological ammunition to deflate and remove them.

This work is carried out by patriotic intellectuals ready to die for our country. Their work is made popular and provides the ideological artillery for today's minutemen working in the field.

This is not work to create more clever rhetoric. It is work to eviscerate evil at the philosophical level.

This scholarship is rendered into straight,clear teaching and disseminated through conferences, publications, and training materials. We need your help. Please support us if you can.

That's on Philosophy

On Geopolitics

The second thing that happened after the fall of the Soviet Union was the rise of the CCP. The new Communist enemy of the US shifted to a Pacific based, Asian culture, Communist enemy.

This is massive and game-changing. Our champions and legislators are only now slowly waking up to understand the haunting patience and malicious ingenuity of the CCP.

We now face two entirely new ominous threats to America, new Western philosophies of division and violence, and a new communist state actor from an elusive culture.

These would have completed their work had God not intervened in the 2016 Presidential election.

A third unprecedented materialism that seeks to crush America and replace it with feudalistic enslavement is trans-humanism and the grotesque vision and master plan of the WEF. I could likewise expose this philosophy, but cannot in a brief introduction.

No country in history could successfully withstand the degree and complexity of attack we are facing now, except one founded by God and made up of free people. Americans belong to God, and we live free or die. The faith is there. The will is there. The genius is there. But the three decade head-start secretly built by the post-Soviet ideologues and infiltrators has put us for the time being in a desperate disadvantage.

There is much to report on how The Settlement Project works to serve our ultimate victory. But I will summarize with three characteristics:

- 1** We bring the ideological war against the Radical Left up to date with knowledge and clarity. To rebuild our culture as a wholesome home for our families and children, the exact design of the enemy must be known. Sloppy defenses will be defeated unfortunately.
- 2** We are human, local, on the ground, and true. We know one another, and we stand our ground together. We meet, and we have each other's backs. The work of The Settlement Project is real, local, and concrete. We can't be broken down by falsehood, spin, fear, and gaslighting. We are not a movement of clicks, "eyeballs," and SEO, Search Engine Optimization. Settlement Project people are like minute men, in a hundred places. It's a family of trust, humility, and hard work. The technocrats don't know who we are or where we are. Their surveillance gets stuck in the mud.
- 3** Finally, we are unequivocally broad, inclusive, and embracing. Wedges of prejudice and bias can't penetrate us. Settlement Project members are Hindus, Muslims, Jews and Christians, every believer, and even non-believers. We have just one identity, we love our families, we are grateful for our religions and our country, and we love our neighbors.

Settlement Project members are center right, center left, way right, a little right. But even so, we are not mushy. We each have clear views and we have them strongly. But when we're together we have just one politics, the laws of nature and nature's God, equal rights under the law, inalienable rights, and we are governed only by God, or by those to whom we give consent.

We are a very big family. We work closely together with groups and cultures we never dreamt we'd ever meet. We quietly make big changes where we work. (LA story)

Our clarity, and humanness and localness makes us invulnerable to gaslighting by corrupt media, and equipped against total surveillance by the corporate-government alliance that seeks to control us. We are building in every region in the US, and lately we are attracting international attention in such places as Italy, Germany, South Africa, and Australia and New Zealand.

As I say. We need your help. We need funds to keep building chapters throughout the US and we have to hire people to create our educational materials. Please help if you can. And please let us know how we can help you.

Thank you for listening. Thank you for coming. Thank you for your support

God bless you. God bless America

The Settlement Project

Enduring freedom and peace are possible
